## Compare

## TBM Jetless

## Jetted Whirlpool Tubs

### Water Purity

TBM is the **ONLY** sanitizable system ensuring elimination of 99% of bacteria for clean and pure bathing.

Not easy to clean.

### Cleaning

In about 5 minutes, every wetted component of a TBM Jetless bath can be cleaned and disinfected.

You cannot physically scrub clean the inner pipe and surfaces.

### Superior Hydrotherapy (No Dead Zones)

Our Jetless hydrotherapy was developed to deliver a unique bathing experience giving you a Total Body Massage.

Most whirlpool tubs offer an assortment of jets with several **DEAD** zones, giving the bather a **LIMITED** hydrotherapy massage.

### Additives

Enjoy essential oils, bath salts, and aromatherapy products. Residue can be completely removed with a simple, thorough cleaning.

It is not recommended using bath salts, oils, or other additives as they build-up in the piping.

### Water Retention

Our Jetless baths are 99% self draining, and easily accessible for cleaning and sanitizing.

Typical whirlpool tubs retain more than a cup of bath water.

### Selectable Hydrotherapy

Unlike traditional tubs that are made with only 6 - 12 jets, a TBM bath uses 30 -60 hydro-ports uniquely designed to provide a Total Stimulation to the body's senses. The system is adjustable to an infinite number of settings of water, air, and firmness.

These systems have **ONLY** one adjustment, the pump.

**Innovative Jetless Design** New technology allows us to deliver a clean, refreshing, rejuvenating, relaxing, Total Body Massage experience with superior performance.

In today's hectic, fast-paced world, more and more people are looking to ease the tensions of daily life and find rest, rejuvenation, and relaxation. Evolution TBM™ technology provides the ultimate blend of powerful hydrotherapy with unmatched sanitation – to give you confidence and peace of mind.

The innovative **EVOLUTION TBM™ (Total Body Massage)** system delivers water, water-air, and air only combinations. The infinite combinations enable you to customize your bathing experience to your individual preference. The 30-60 Hydro-Ports produce wrap around water movement and a 360-Degree coverage with **EQUAL PRESSURE** and therapeutic action to your entire body.

Evolution TBM™ baths deliver effective hydrotherapy with greater flexibility and more control than conventional systems. This means far greater benefits to YOU.

**No DEAD zones** – Jetted systems have dead zones from jet to jet creating stagnant areas with no hydrotherapy action.

# TOTAL BODY MASSAGE

## The Only Cleanable Jetless System!

Let Trajet show you an entirely new way to enjoy spa bathing with PURE, CLEAN water that makes your bathing experience exactly what it should be: **sanitary, healthy and invigorating.**

Trajet's TBM baths incorporate a new revolutionary design to give you unmatched hydrotherapy and the assurance of clean, pure water every time you bathe. Trajet's new design allows the complete hydrotherapy system to be **CLEANED** and **SANITIZED. EASY TO ACCESS** cleaning ports allow quick and effective cleaning and sanitizing in just a few minutes, making your bath clean and fresh for its next use.

In the cleaning mode, anti-bacterial solution enters the cleaning ports and flows throughout the entire system!

**Cleaning is as easy as 1-2-3.** Open cleaning port, then pour in sanitizing solution and brush; the system will be cleaned and sanitized giving you peace of mind. This has never before been possible in any hydrotherapy system.

Also, **HARD-TO-CLEAN** and bacterial laden conventional jets have been eliminated.

## The World's Only Total Sanitary System!

FIRST THERE WAS THE WHIRLPOOL... NOW THERE'S EVOLUTION TBM™

**BATHING** has reached a new level of performance, style and function! Thanks to Trajet's innovative engineers and our revolutionary and patented system, Trajet has raised the bar in TBM ("Total Body Massage")!

TBM™ is 99% self draining when the unit is shut off! The typical whirlpool tub retains several ounces of DIRTY bath water. When you relax in a standard whirlpool, you're not alone. Yesterday's water breeds bacteria. Trajet's Evolution TBM™ hydro-port manifold is completely cleanable, so your next bath is pure and refreshing – exactly the way it's supposed to be.

**Only Trajet's TBM baths deliver bathing with unequalled cleanliness – the way nature intended.**

## Go Ahead Pamper Yourself...

Everything about our revolutionary design is focused on giving you the ultimate in a genuine spa experience.

TBM™ brings gentle, but powerful streams together from multiple Hydro-Ports to envelop your body in a soothing cushion of therapeutic relaxation.

Evolution TBM's engineering allows for spa treatments that use additives like therapeutic bath salts and essential oils that should not be used with traditional piped whirlpool systems. Instead of ordinary bathing, Trajet delivers a spa-quality experience – adding a new dimension to home bathing.

Your bath interacts with your senses and creates a fully satisfying and sensuous experience. Feel the gentle caress of warm, pure water on your skin and smell the uplifting aromas of revitalizing oils and minerals.

## Select Comfort Bath

Selectable 360° Bathing, which can only be found on an Evolution TBM™ tub by Trajet, represents the ideal combination of water, air, and firmness for your body, giving you the ultimate bathing experience.

Unlike traditional tubs that are made with only 6 to 12 jets, the TBM™ bath uses 30 to 60 hydro-ports uniquely designed to provide a **TOTAL Stimulation** to the body's senses. The system is adjustable to an infinite number of settings to accommodate your personal preferences in comfort and firmness.

**SIDE, FOOT and BACK JETS surround you with a unique sensation.** Trajet's Evolution TBM™ customizes your bathing experience with more stimulating Hydro-Ports you could ever dream of! We're so sure you'll absolutely love this system... we're staking our 30 year reputation on it!

The back and foot hydro-ports are OPTIONAL.

# PURE Simplicity, PURE Relaxation, PURE Evolution TBM

# Smooth, Pristine Look of TBM...

delivers a clean, refreshing, rejuvenating, relaxing, 360° Total Body Massage experience with superior performance.

The nearly invisible Hydro-Ports give the Evolution TBM™ a sleek and smooth look. Everything is flush and pristine and there are NO protruding jets to lean against and obstruct your bathing comfort.

**No need to clean, maintain, or replace jets. Dirty jets are a thing of the past!**

TBM offers a minimalist look that allows the beauty, elegance, and style of your bath tub to be the center of attention. TBM complements and blends with your bathing environment. TBM is truly an innovative and pristine design and starts a new generation of hydrotherapy. You'll actually have to look twice to see that it's really a full-function hydrotherapy tub.

## Rest Assured....

Buy from a company with 30 years of whirlpool bathing know how.

Trajet has always led the industry in bathing excellence. Tens of thousands of satisfied owners since 1981 can't be wrong. This year, Trajet celebrates it's 30th year in business. As a fitting legacy to it's history...Trajet has now raised the bar with the TBM system and created a new standard in the bathing industry!

**ALL TRAJET TUBS are FACTORY FOAM INSULATED and SOUND DEADENED!** The foam insulated system keeps water hot for hours and buffers pump noise to a minimum of decibels. The rigid foam lasts for the life of the tub and also eliminates sagging pipes and rattles (common in competitor's tubs). You'll love the fact that your TBM bath won't annoy other members in your household while it's running.

Easy access cleaning ports makes the Evolution TBM system simple to sanitize.
